

Cauliflower

Synergy

Synergy continues to form good curds even in warm summer growing conditions. Novaria has an upright plant habit, and good self covering of the curd. It gives very attractive white curds, very firm and dense. The presentation in the commercial package is excellent. With its good heat tolerance, Synergy will give the best performances in summer production in temperate climate.

Variety	Maturity Days	Harvest Period				Head		Plant Leaf cover	Comments
		Spring	Summer	Autumn	Winter	Size	Colour		
Novaria	75-80		x			compact	very white	good	Excellent spring/summer variety with a compact, well covered and very white curd.

Vesuvia	125-150	x			x	large	white	good	Winter processing variety with very dense curd. High production.

Radish

Celesta

An excellent radish hybrid with a short, very solid and upright growing character. Suitable for cold growing under glass, tunnels as well as outdoor cultivation. Celesta is very stable under cold and wet conditions and has a very strong skin. Celesta has reliable, fine roots, long lasting green cotyledons and can be stored for long periods.

Variety	Cropping		Cultivation Period				Comments
	Protected	Open Field	Spring	Summer	Autumn	Winter	
Brava		x				x	Uniform, fast growing, very dark green upright foliage, round bulbs, nice red colour,. Very fine roots, good attachment (for mechanical harvest).
Celesta	x	x	x	x	x	x	High quality and reliability. Very uniform round bulbs, very bright red colour, easy to harvest.
Lucia	x		x		x		Spring and autumn variety for north Europe open field crops
Rudi	x		x	x	x		Standard variety for open field crops in many professional radish production areas.
Tarzan	x	x	x			x	Very fast growing variety for greenhouse, tunnel and spring open field crops
Vienna	x		x	x	x		Excellent internal quality, for processing and fresh market. Vienna can grow up to 50mm in diameter with good internal quality.

Leek

Previta

A new hybrid from Enza Zaden. Particularly recommended for summer production in North West Europe. Previta gives exceptional yields of very uniform, attractive leeks. Certainly a variety to try for all professional leek growers.

Variety	Cultivation Period				Plant	Shaft length	Leaf colour	Comments
	Spring	Summer	Autumn	Winter				
Hybrids								
Previta		x			medium	medium green	Recommended for summer harvest in North West Europe. Very uniform size and shape. High production	
OP Varieties								
Gavia				x	medium	dark green	Recommended for harvest in March/April in NW Europe. Excellent winter selection.	
Tadorna			x		medium	medium green	A very productive and reliable variety for autumn to early winter production.	

Chicory Witlof

Metafora

Metafora combines good yield, high quality levels and good shelf life into a top quality variety. The roots are extremely uniform in size. In the forcing room Metafora is easy to grow and the chicons are white, dense and have a short pit. Metafora is recommended for use in mid to early and very late forcing periods.

Redoria

Redoria is a medium maturing red witlof hybrid. The chicons have an excellent intense red colour and very acceptable taste. A top quality variety for intensive production. Fits perfectly into a mixed coloured flow pack, very attractive appearance.

Variety	Leaves	Colour	Comments
	Maturity		
Metafora	medium to late	white	Main crop variety. High yield and uniformity. Excellent quality and very easy to clean. Metafora is well appreciated by professional growers.
Redoria	medium	red	Redoria is a standard hybrid in the re type. The colour is very intense red. Redoria has an exceptional and special taste. Highly recommended.
