Spinach

T Bird

T bird is a variety for fresh market and baby leaf use. It is suitable for summer cropping at high density. The leaf shape is oval round with a dark green colour. It has an excellent field standing ability and is very strong against leaf burn. The variety is easy to harvest and high yielding.

Grandi

Grandi is very best suitable for fresh market and baby leaf market. It has an upright growing and is very reliable. The leaves are round and slightly wrinkled.

Yabi

This vigorous variety is the variety for the summer period. Yabi is very strong against bolting and shows an excellent field standing ability. Suitable for processing and fresh market. Outstanding is also the upright plant habit, it's attractive colour and the high yield.
