

Aromatic Herbs

Variety	Cultivation			Description
	Fresh Cut	Processing	Pot Plant	
Basil				
Edwina	x		x	Very dark green, fast growing Genoveser type. Recommended for year round production, also in the winter period with fresh dark green colour.
Emily	x	x	x	Compact, big sized, medium to dark green Genoveser variety. Because of improved shelf-life we recommend Emily for the summer production in more balanced climates, and all year round in hot climates.
Genoveser	x	x		Shiny, dark green, spoon shaped leaves. High yielding special Genovese selection.
Piccolino			x	Very compact growing Basil with a strong aroma. Ideal for pot or for balcony growing.
Rubin			x	A valuable selection with an intensive deep red colour, excellent aroma and quick growing.
Chives				
Naomy	x	x	x	A medium to thick shafted, dark green chive with a high stability.
Nelly	x	x	x	A middle thick shafted, dark green variety with high tipburn tolerance.
Staro	x	x	x	Extra thick and dark green leaved variety for all growing purposes, forcing and pot growing.
Rucola Coltivata (common)				
Rucola Coltivata	x	x		Quick growing, high yielding, oval-leaved type.
Rucola Selvatica (wild)				
Grazia	x	x		A new uniform, very dark green wild rocket selection with fine leaves and improved bolting tolerance.
Venicia	x	x		Fast and uniform growing Rucola selvatica with medium serrated, large and very dark green leaves. Extra late flowering. For summer production.

Naomy

Herbs

Selvatica Grazia

Basil

Emily

Emily is a very compact pot Basil variety in the Genovese type with medium large leaves. We recommend Emily for the summer production in more balanced climates, and all year round in hot climates or production under high light intensity. The elongated shelf-life of Emily enables an extended transport phase.

Chives

Naomy

Medium to thick shafted, dark green chive with a high resistance against brown tips and a very rapid growth! The variety is very suitable as a bundle product for the fresh market and loose for the processing industry. Due to the strong root system and growing power soil structure influence is relatively low.

Rucola Selvatica (wild)

Grazia

A variety with very dark green leaf color, high uniformity and compact plant construction. The very uniform long, finely serrated leaves have a good strength and present themselves very well as a bundle or in bowl. Grazia is blooming later than usual rocket selvatica origins.

Gigante d'Italia

Variety	Cultivation			Description
	Fresh Cut	Processing	Pot Plant	
Celery				
Celbunch (E 93.6700)	x	x		Good grower, uniform plant with medium large leaves and dark green colour.
Celtop	x	x		Strong growing variety with good yield and dark green, large leaves. Suitable for all markets.
Coriander				
Marino	x	x		A thickly feathered, fine stalked leaf coriander for cutting. Quite late bolting.
Dill				
Goldkrone	x	x		Especially high yielding and late flowering, therefore well suitable for extensive growing.
Green Sleeves	x	x		A very stable, dark green dill of the leafy type for production of fresh bundles. Greensleeves is strong against bolting and is duly suited for all year round growing.
E 93.02518	x	x	x	New fast growing very compact dark green dill for pots and short bundles in the typical Dill commun leaf type. Extra stable stems due to a very short hypocotyl.
Parsley				
Commun 2	x	x		Enza Zaden's selection in the plain leaved type: very aromatic, dark green combined with a high yield.
Gigante d'Italia	x	x		A plain leaved variety, very aromatic and high yielding.
Moss Curled 2	x	x		A medium fine curled, dependable selection. Dark green and uniform.
