

Tomato

Large Beef

Belle

Belle is the worldwide standard for the cultivation of beef tomatoes in non-heated conditions. Its quality and reliability is recognized by many growers, shippers and consumers. Belle is widely adaptable, performing well in greenhouses, tunnels and under nets. The plant growth is compact, quite open and easy to work in. A strong feature is the regular fruit setting and development. Belle is quite early into production and is a steady producer of high quality beef tomatoes.

Elpida

Elpida has a vigorous, healthy plant habit. It is strong growing with an open, horizontal leaf positioning. Elpida sets fruits well under high as well as cold conditions. The high quality fruits are very regular in size (240-260 grams) and uniform in shape. Particularly recommended for autumn and winter non-heated protected cropping. One of Enza's top beef tomato hybrids.

Rally

Rally has a quite vigorous and compact plant habit with large leaves. The variety sets well in hot conditions and has a regular plant development. Especially the first clusters set very well with very big sized fruits. Rally is very suitable for spring production. A standard variety in East Europe and the Eastern Mediterranean region where it is appreciated for its superb fruit quality and outstanding yield!

Tymaxx

Tymaxx is a new export beef tomato from Enza! The plant is strong growing, making it suitable for both open field and protected production. The strong package of disease resistances make Tymaxx ideal for growing in difficult conditions. The fruits are outstanding in quality, with an excellent uniform shape and shiny, attractive red at full maturity. Tymaxx has an excellent shelf life!

Tomato

Medium Beef

Afamia

Afamia is the new winter tomato variety from Enza Zaden! The strong, easy growing plant grows through the winter with good setting. The flat-round fruits maintain their size easily until the end of the season. The long shelf life fruits are beautiful deep red in colour, firm making Afamia a must for every grower who needs a quality tomato in the winter segment.

Halay 344

The strong vigorous plant habit of Halay 344 makes it especially suitable for cropping in difficult growing conditions. Halay 344 produces large numbers of very uniform, large sized fruits on average 160-200 grams. Halay 344 is a very popular hybrid in many countries and growing regions. Excellent shelf life and shipping qualities.

Hanedan

Hanedan is a new export type for winter cropping in protected greenhouses where TYLCV is a problem. Hanedan produces excellent quality tomatoes on average 150 grams in size. The plant is strong growing, open and easy to work in. High total yield of export quality tomatoes.

Yosra 448

An easy setting variety, especially in hot conditions during summer and early autumn productions. The plant is quite generative and open which makes it a suitable variety for non-heated greenhouses in Southern Europe, as well as for outdoor cultivation. The fruits are very firm, flat-round in shape with an average weight of 150-170 grams.

Afamia

Tomato

Medium - Truss Harvest

Pitenza

Pitenza is Enza Zaden's famous truss harvest tomato hybrid, widely used by professional growers throughout the world. Also very suitable for loose picking. The fruits are on average 100-120 grams in size, round and firm and very attractive red at full maturity. The shelf life is outstanding! Pitenza has a strong growing plant habit and sets fruits well under different growing conditions. Pitenza is recommended for both unheated greenhouse and tunnel crops. It is one of the very few varieties to be able to produce good truss tomatoes during the winter period!

PITAYA

Tomato

Annamay

Cocktail

Annamay (E 21.33543)

A superb new hybrid from Enza Zaden! Annamay is a slightly smaller sized cocktail tomato with an extremely attractive fruit quality and very sweet and aromatic flavour! The trusses are well shaped, compact and very uniform. Annamay has a strong and compact plant habit. A variety for the heated greenhouse growers.

Campari

Enza Zaden leading cocktail hybrid worldwide, Campari is still top of range in all markets and cocktail segments. The fruits are on average 45-50 grams in size and form extremely uniform trusses. They are round in shape, shiny attractive red and have a quality level second to none. Suitable for single fruit harvesting or on the vine.

Cherry

Claree

Claree is our standard heated greenhouse cherry tomato hybrid. It is a very reliable variety and produces high quality fruits. The fruits are round in shape, on average 15-16 grams in weight, very firm and a beautiful shiny red colour at maturity. Claree gives an extremely high production.

Nectar

Nectar is a superb tasting medium-large sized cherry tomato hybrid, a standard with professional cherry tomato growers. The average fruit size is 30-34 mm, and the average fruit weight is 15-18 grams. Nectar keeps the calyx very well on the harvested fruits. The fruits are round and deep, attractive red colour at full maturity.

Tomato

Large Plum

Savantas

Savantas is the standard hybrid in the heated greenhouse truss harvest plum tomato segment. Savantas produces extremely uniform trusses of quick and even colouring, attractive shiny fruits. It has a fantastic taste and is easy to slice. The plant habit is strong growing and well balanced. The uniform truss shape in combination with the firm green parts ensure a splendid presentation. The average fruit weight is 100-110 grams. Savantas is a top-class world player.

Naram

The best hybrid in its category from Enza Zaden! A large fruiting plum tomato hybrid suitable for production in protected greenhouse conditions. The plant is strong growing with medium to short internodes. Fruit setting ability is excellent, the trusses form regularly up the plant. The fruits are on average 140-150 grams, firm and shiny red at maturity and uniform in shape. High level of production and excellent disease resistance package.

Small Plum

Sunstream

Sunstream, the original strawberry shaped mini plum tomato hybrid! A unique product! Very sweet and flavourful. The firm flesh produces an initial sweetness and combined with the juicy centre creates a full tomato flavour. Suitable for both loose and truss harvest, the fruits weigh on average 20-25 grams and are a deep, red shiny colour at maturity. The very strong growing require a generative growing regime to achieve the best results.

Vespolino (E 21.33536)

A new mini plum tomato hybrid from Enza Zaden! The fruits are on average 25-30 grams in size, very firm and attractive shiny red in colour at full maturity. Vespolino produces excellent, uniform trusses and has a relatively high overall production. A quality tomato for the speciality segment! The medium-strong plant sets fruits easily and can be grown in a wide range of protected growing conditions. A new, exciting variety to include in any professional growers programme.

Tomato

Open Field Determinate

Aisha

Aisha is an attractive new variety from Enza Zaden with a very interesting package of resistances. The fruits are large in size, 180-220 grams, very uniform and firm. Aisha is an early, highly productive variety. The fruit firmness is good, together with a deep red colour. A suitable variety for areas where large sized fruits and TYLCV resistance are important requirements.

Fora 922

Fora 922 is a very productive, strong growing hybrid, producing a very high percentage of high quality, firm fruits with an average weight of 230-250 grams. The plant is very healthy and green and sets fruits well in the main production season. Fora 922 has shown it can outperform many varieties in the same type.

Lojain

Lojain is a superb quality tomato hybrid with an outstanding resistance package. The round fruits are very uniform and firm with an average size of 170-190 grams. Fruit set is excellent. The plant has good growth and covers the maturing fruits well. Lojain is an early, highly productive variety.

Sadeen

Sadeen is a widely adapted tomato hybrid with excellent fruit setting ability and good leaf cover. The fruits are very uniform, large sized, firm and extremely attractive deep red colour at full maturity. Sadeen can be produced in the open field from a wide range of sowing dates. The main standard in many major markets.
