

THE POWER OF HEALTHY FOOD

THIS IS ENZA ZADEN

Enza Zaden is a vegetable breeding company. We develop new vegetable varieties. Our company produces and sells the seeds of these varieties all over the world. We use traditional breeding methods supported by modern, highly advanced technology.

"Our aim is to grant people anywhere in the world access to healthy, varied vegetables"

OUR VARIETIES

are attuned to (local) market, climatic and growing conditions

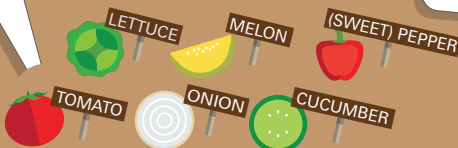

460 MILLION

people eat our vegetable varieties daily, worldwide

20 BILLION

heads of lettuce, annually grown from our lettuce seeds

31 crops, including:

INNOVATION

annually **75 MILLION** euros for R&D

150 new varieties per year

VEGETABLE BREEDING. FOCUS ON:

- + Resistances
- + Taste & nutrients
- + Yield
- + Attuned to changing climatic conditions
- Pesticides, water, fertilizers in cultivation

ORGANIC SEEDS

Specialized subsidiary Vitalis Organic Seeds

INNOVATIVE CONCEPTS

By cooperation with growers, retailers, traders and consumers

SEED PRODUCTION

- On 6 continents
- In 25 countries
- 815,000 kg of vegetable seeds per year
